

# Plastic Lawn and Garden Delimiter

## Plastic Grass Delimiter Led / Ledless

Grass delimiter or grass separator products are landscape decor elements produced to clearly separate areas such as podima stone, slag, pumice stone, pumice stone, walkway, dolomite stone and to provide shape.

## Areas of use

- Limiting the edges of the lawn finish
- Restricting tree bottoms
- Limiting mulch
- Gravel limitation
- Plant bed delimitation
- Creating herbal patterns and shapes

## Product content

25 metres of plastic grass delimiters, 50 plastic fixing stakes to keep a seamless product in place between different parts. The product is produced with original raw material. It does not break in extreme hot and cold weather. Its service life is minimum 10 years. Since the product is flexible, pot holes may occur in straight line applications. You can examine our other products for straight line applications.

## Advantages

- Quick and easy assembly
- It perfectly separates it from the lawn area and other garden elements.
- Does not come out of the ground thanks to plastic stakes
- Easy to apply. No additional product required.
- It can be cut from the desired place.
- You can create flexible and curved lines.
